

Blackbutt Battens used to create a stunning facade

TMP Group is leading the way in providing architecturally innovative timber products and solutions to the construction sector.

The recently completed Fisher St Carpark at Cabramatta was another benchmark project for TMP Group. Blackbutt timber battens were used to create a facade inlaid with a fish pattern for an amazing outcome.

ADCO Constructions - Contracts Administrator

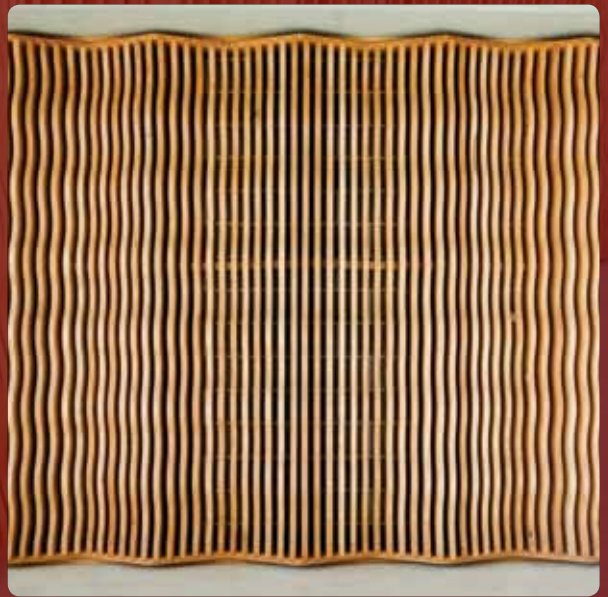

“We have used TMP Group on a number of different projects, finding them to be reliable, professional and efficient supplier and manufacturer of specialised, architectural timber components. They provided options and followed through with solutions to make the specialised timber facade for this project a successful outcome.

We completed the recent Carpark Project in Cabramatta that involved TMP supplying over 10 kilometres of timber. TMP were very professional and accommodated us with staged delivery to site.”

Feature Wall Blackbutt Timber

Internally, a unique feature wall makes for an exciting and interesting use of FSC Kiln Dried Blackbutt.

TMP Group provided solutions for any complexities of design and manufacture to make this stunning result achievable.

TMP Group manufacture and supply a large range or architectural building products, including:

- Intrim Architectural Mouldings & Profiles
- Duralok PVC Fence System
- Architrim Timber Stair Treads, Hand Rails and Custom Joinery Products
- Extrim External Heritage and Federation Timber Products
